**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Information Disclosure Statement***

2. The information disclosure statement (IDS) submitted on 1-29-2004 has been considered by the examiner. However, several of the cited foreign patents do not include an English abstract and the examiner has not been able to acquire translations. Therefore, those patents have not been considered at this time. Please provide English abstracts for these documents.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kinoshita et al. (4,887,131). The photographing apparatus by Kinoshita et al. teaches a developer containing both toner and carrier; a development unit comprising a developer roller; a development bias; a photosensitive body; and wherein a ratio of the volume of the carrier in a space between the photosensitive body and the developer roller is 32 to 46 percent. Kinoshita et al. teaches this percentage since the claimed space can be defined as any size within the total space between the developer roller and the photosensitive body.

***Allowable Subject Matter***

5. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
